

UPGRADED REMODELING | HOMEOWNER GUIDE

The Bathroom Remodel Planning Workbook

Design a bathroom that feels better, functions better, and lasts

Use this workbook to define your ideal bathroom before your remodel begins.

Austin | Bee Cave | Westlake Hills | Lakeway

A note from Upgraded Remodeling

This original planning guide is designed to help you have a clearer remodeling conversation. It is general planning information, not a construction contract, code interpretation, or financial advice. Requirements and conditions vary by home and jurisdiction; confirm the details of your project with the appropriate professionals before finalizing your scope.

0.1 Define the experience you want

A successful bathroom remodel begins with the way you want the room to feel and function. Is the goal a calm primary-suite retreat, a durable family bathroom, a comfortable guest space, or a more accessible layout for the years ahead?

Choose a few words that describe your target experience: bright, warm, simple, spa-like, classic, low-maintenance, open, or private. They become a useful filter for every design decision.

0.2 Evaluate the current layout

Make a short list of what works and what does not. Pay attention to clearance around the vanity, shower size, storage, lighting at the mirror, natural light, toilet privacy, and how easily the room can be cleaned. If you are considering moving plumbing or enlarging the room, record why the layout change matters. A clear purpose helps you weigh the benefit against the added scope.

0.3 Choose materials with intent

Flooring and shower finishes should balance visual impact with practical maintenance. Consider slip resistance, grout upkeep, durability, and how the finish connects to the rest of the house.

Select fixtures as a coordinated family. Finish, scale, water delivery, lighting temperature, storage hardware, and mirror proportions should all support the same design direction.

0.4 Plan for construction

Decide which bathroom your household will use during construction and where temporary toiletries will live. A thoughtful plan helps the project feel more manageable from the first day of work.

Discuss ventilation, waterproofing, plumbing condition, electrical needs, and any approvals with your contractor before work begins. These decisions are foundational, not cosmetic.

0.5 Bathroom consultation checklist

Bring room measurements, inspiration photos, a list of problems to solve, preferred materials, and an approximate investment range.

Ask the project team how scope, selections, scheduling, and change decisions will be documented throughout the process.

Ready to discuss your remodel?

Upgraded Remodeling is an Austin-area design-build team for kitchen remodels, bathroom renovations, whole-home transformations, and custom projects. Schedule a free consultation at upgradedremodeling.com/contact-us/ or call 512-799-7950.
